

Press Release

EBV Elektronik Expands Linecard with Renesas Electronics

Munich/Poing, 15th May 2019 - EBV Elektronik, an [Avnet](#) company (Nasdaq: [AVT](#)), announces that it is adding the complete product range of Renesas Electronics, a leading supplier of advanced semiconductor solutions, to its portfolio. This will enable EBV to offer Renesas' broad range of microcontrollers as well as analog, power and system-on-chip products to its customers.

The addition of Renesas to EBV's linecard follows the company's recent acquisition of EBV supplier Integrated Device Technology (IDT), a leader of RF, high-performance timing, memory interface, real-time and optical interconnects as well as wireless power and sensor solutions. Customers of EBV will benefit from this [winning combination](#) of Renesas and IDT in numerous high-growth, data-driven economy markets such as automotive, industrial IoT, and infrastructure applications.

"We welcome Renesas to our linecard as it provides even more comprehensive solutions for our customers. Their product range targets a wide cross section of automotive, industrial, home electronics, automation and communication technology applications. It is an ideal addition to our existing IDT offerings and enables us to deliver an even broader range of leading-edge technology solutions," commented Slobodan Puljarevic, President EBV Elektronik.

"This year EBV celebrates our 50th anniversary in business which is due to our long-term relationships with our many suppliers and customers. We look forward to continuing to grow these key relationships into the future. Plus, working with new technology partners like Renesas will help to strengthen and shape our path for the next half century," concluded Puljarevic.

###

About EBV Elektronik

EBV Elektronik, an Avnet (NASDAQ:AVT) company, was founded in 1969 and is the leading specialist in European semiconductor distribution. EBV maintains its successful strategy of personal commitment to customers and excellent services. 240 Technical Sales Specialists provide a strong focus on a selected group of long-term manufacturing partners. 120 continuously trained Application Specialists offer extensive application know-how and design expertise. With the EBVchips Program, EBV, together with its customers, defines and develops new semiconductor products. Targeted customers in selected growth markets will be supported by the Vertical Sales Segments. Warehouse operations, complete logistics solutions and value-added services such as programming, taping & reeling and laser marking are fulfilled by Avnet Logistics, EBV's logistical backbone and Europe's largest service centre. EBV operates from 65 offices in 29 countries throughout EMEA (Europe – Middle East – Africa). For more information about EBV Elektronik, please visit www.ebv.com.
